

Filter the noise in oil industry news and focus on what you really need to know for long-term strategic decisions.

For almost 40 years, the weekly OPIS Newsletter has reported on the fuel market with greater insight, context and attention to what comes next than other competitive news sources.

Market Challenge

The fuel market is constantly evolving, shaped by supply and demand shifts and changing regulations. There's more downstream energy news published 24/7 than most players can possibly track or sift for importance. Repackaged company press releases can't offer the breadth of insight the market needs, while specialized news often comes with a premium price tag that erodes its overall value.

How We Help

OPIS Newsletter delivers weekly petroleum industry developments in a way that other sources don't – with more meaningful analysis and interpretation of market trends, at an affordable price. Our coverage includes the entire fuel supply chain including benchmark pricing and data snapshots of market moves.

Benefits

- Learn operational and supply issues that go beyond corporate statements from refiners, distributors and midstream infrastructure operators
- Discover best practices for optimizing fuel purchases and sales
- Spot trends before investors do
- Estimate the effect on regional supply & demand of changes to U.S. infrastructure and company strategy
- Anticipate the future direction of the downstream market for competitive advantage
- Get weekly benchmark pricing by PADD
