

Verify supplier invoices and discover new market opportunities.

OPIS TimeSeries provides on-demand access to more than 30 years of fuel price history for in-depth market trend analysis.

Market Challenge

Buyers and sellers in the fuel market need an accurate source of historical data to verify and reconcile invoices. In a market that often follows seasonal patterns and cyclical trends, past price data also helps predict future price moves.

How We Help

Available online any time, OPIS TimeSeries is an easy-to-use database providing 30+ years of spot pricing for gasoline, diesel and NGLs, plus 20+ years of wholesale pricing for nearly 400 racks. It automatically aggregates daily prices into averages across time periods you set, so you can quickly analyze market trends.

Benefits

- ✓ Reconcile and audit invoices to ensure you're paying market value
- ✓ Perform charting, streaming and regression analysis
- ✓ Evaluate branding decisions
- ✓ Enhance negotiating position with spot-to-rack comparisons
- ✓ Clarify hedging strategies by comparing NYMEX futures to local prices
- ✓ Reduce in-house cost of data storage
