# CAMIRO: Carbon & Clean Fuels Analytics, Market Intelligence & Regulatory Outlooks

**OPIS**
A DOW JONES COMPANY

*Optimize your company's compliance carbon market and clean fuels strategies with real-time policy insights, sophisticated price forecasts, and analyst outlooks.*

## Market Challenge

As regulations continue to evolve globally, businesses need access to reliable data and foresight to make informed decisions. Compliance is becoming more complex and staying ahead of regulatory shifts is crucial to minimizing risk and capitalizing on market opportunities.

## How We Help

For over a decade, OPIS has been a trusted leader in providing accurate and reliable spot price data and expertise in the carbon, clean fuels, and renewable energy markets with its internationally-recognized OPIS Carbon Market Report, OPIS Biofuels Report, and OPIS Global Carbon Markets Report.

**Now, with the introduction of CAMIRO, OPIS is the ultimate solution for businesses navigating the complexities of these markets.**

In addition to prices, OPIS has a reputable track-record in delivering timely news and insights into emissions trading schemes (ETS), fuel-related carbon intensity (CI) and carbon credit per gallon (CPG) programs, voluntary carbon markets, and sector-specific compliance programs (e.g., CORSIA).

## Who We Help

CAMIRO is designed for carbon-intensive compliance covered entities (e.g., Oil & Gas, Chemicals, Iron & Steel, Power, Transportation, and Aviation) and key stakeholders such as suppliers of clean fuels and carbon offsets, investors, and brokers/traders.

With this comprehensive subscription service packed with powerful market intelligence and analytics needed to be competitive in today's carbon-focused world, professionals across various teams from regulatory affairs and compliance, policy, analytics, trading, procurement, and strategy are empowered with the data and foresight needed to evaluate the impact of policy shifts, track compliance costs, and assess future carbon credit and clean fuels prices.

## Key Product Features

✓ **Usability:** Downloadable policy and pricing reports, and for premium levels an integrated data browser with daily and forecasted prices and visualizations.

✓ **Date Range:** Historical data spanning 10 years, with price forecasts for short and long-term planning.

✓ **Sectors:** Policy analyses and outlook views at the program and sector levels.

✓ **Markets/Commodities:** Comprehensive pricing and modeling for carbon market allowances and offsets, and clean/renewable fuels credits, covering key programs such as California and Quebec (Western Climate Initiative), California Low Carbon Fuel Standard (LCFS), Oregon Clean Fuels Program (CFP), State of Washington, Regional Greenhouse Gas Initiative (RGGI), and U.S. EPA Renewable Fuel Standard (RFS).

✓ **Frequency:** Weekly updated policy coverage and price forecasts on carbon allowances, offsets, and clean/renewable fuels credits.

## Benefits

Whether it's tracking compliance costs, monitoring carbon credit and clean fuels prices, or evaluating the impact of policy shifts, CAMIRO offers the actionable intelligence needed to be competitive in today's carbon-focused world.

✓ **Stay ahead of regulatory changes** across key global markets with deep-dive policy insights on current, forthcoming, and proposed carbon and clean fuels programs, emissions trading schemes, carbon taxes, legislations, and more.

✓ **Enhance compliance and trading strategies** with sophisticated price forecasts and analyst commentary.

✓ **Make informed decisions** with robust analytics and expertise from a team of analysts on policy and regulations, markets and commodities, and pricing models.
