- U.S. Oil and Refining

### Cap and Invest Line Item, LCFS Built into Price

- ExxonMobil
- PMR
- PMR-XOM

### Cap and Invest and LCFS Both Line Item

- BP
- Sinclair

## Important Program Notes & Exceptions

- **Verification:** For all listed suppliers, OPIS confirmed the assessment method either directly from the supplier, via an official announcement, or through industry sources.
- **Pure Bio/ethanol & Propane Exceptions:** Suppliers like Kinergy, Midstream, and Targray (who supply only pure bio/ethanol and propane) see no impact and no normalization stemming from the LCFS assessment.
- **Valero Propane:** While their posted rack prices include GHG assessed costs, OPIS notes that they may not adjust any propane prices.
- **Combined Values:** The Posted LCFS normalization costs in OPIS Rack reports include **both** the OPIS LCFS Assessed Value **and** the OPIS Crude CI Deficit Assessed Value combined.

\*California initiation date breakdown:

-Cap and Invest was added effective 1/1/2015

-LCFS was added effective 12/31/2015

-Crude CI Deficit was added effective 1/1/2020

<sup>1</sup>While most suppliers utilize the OPIS Assessed value of Cap and invest and LCFS in regulatory impacts on prices, we reference the supplier's own assessment where available.
