OPIS Global Marine Fuels Report

Global bunker and cargo fuel prices & global shipping market analysis

The OPIS Global Marine Fuels Report delivers daily price assessments for 0.5% VLSFO, marine gasoil and high-sulfur bulk and bunker fuels in the most important ports around the world.

The report includes decarbonization data, providing transparent daily price assessments for European carbon compliance costs and methanol bunker prices. The assessments include OPIS Europe Marine Cap-at-the-Port (CAP) prices for a range of fuels, including HFO, LFO, LNG, LPG, methanol, and MGO.

How We Help

The OPIS Global Marine Fuels Report provides daily full-day price assessments for 0.5% VLSFO along with key marine fuels in the most important ports of Asia, Europe and the Americas. This quick-read report identifies the ports selling the most volume so you can focus on market movers. Charts, graphs and tables reveal price trends at a glance worldwide.

Decarbonization Coverage

The report includes OPIS Europe Marine Cap-at-the-Port (CAP) prices, which represent the cost of complying with EU carbon regulations for 1 metric ton of various marine fuels under the EU Emissions Trading System (EU ETS). These are based on the price of EU ETS allowances and carbon emissions factors, and are provided in €/mt and $/mt with distinctions for jurisdictional and non-jurisdictional EU CAP categories. Weekly Grey Methanol Bunker prices are also included.

Key Features & Benefits

BTU Indicator

Helps you plan costeffective fuel purchases by calculating the energy content in the 0.5% sulfur spec compared to legacy bunker fuels.

Off-Road Diesel

Includes price assessment for dyed diesel for Houston, New York, Vancouver, Seattle, Philadelphia, New Orleans and many more locations.

Grey Methanol Bunker Prices

These prices include storage and logistics costs factored in are available for Houston, Rotterdam, and Singapore, with corresponding VLSFO equivalents, calculated as replacements for bunker fuel costs.

Additional Benefits

- Full-day pricing assessments provide true transactional value while news and commentary provide market context.
- Concise and priced to fit any budget and robust enough to stand alone as your pricing benchmark.
- Email and phone access to editorial experts ready to answer your questions.
