

OPIS RackPro

Discover Real-Time & Historical Fuel Prices

Take control of your fuel pricing and purchasing decisions with OPIS RackPro, the ultimate platform for exploring live rack prices, benchmark values, insightful analytics and historical data, all within a user-friendly interface.

Now also including automated email delivery of rack prices, so you can set it up once and only go back to it if you want to change your data delivery.

Market Challenge

Accessing real-time and historical rack pricing data in a single, easy-to-use platform has long been challenging for fuel buyers and sellers. Without a comprehensive solution, users struggle with fragmented data sources, a lack of timely insights, and inefficient monitoring of market fluctuations.

How We Help

OPIS RackPro consolidates essential pricing information from legacy OPIS rack products — WebRacks, Real-Time Racks, and Bottom Line — into a single, powerful platform. This ensures that fuel buyers and sellers have the most up-to-date pricing insights at their fingertips, allowing for better decision-making and contract negotiations.

Key Features & Benefits

Custom Price Reports & Automated Delivery

Set up personalized reports to monitor specific markets and products. Automate your rack price data delivery directly in your email.

Comprehensive Price Monitoring

Track all price moves for selected racks, products, and suppliers over a chosen timeframe.

Enhanced Bottom Line Data

Access the lowest and average observed prices under the OPIS Net Terminal Low, along with the number of offers.

Additional Benefits of Using RackPro

- **Automated Notifications** - Receive alerts via email or within the platform.
- **Rack Price Map** - Visualize rack cities, terminals & pipelines all in one map.
- **Historical Pricing** - Access up to 30 days of price history.
- **Intraday Price Analytics** - Stay on top of market moves instead of looking back after the fact.
- **Export Rack Data** - Download rack data in PDF or CSV format.
